The nasal flu vaccine contains products derived from pigs (porcine gelatine). If the vaccine is refused due to this content, only children who are at high risk from flu due to a medical condition will be offered an alternative injected vaccine. More information is available from www.nhs.uk/child-flu-FAQ

A record of your child's immunisation is held on the child health information system and will be shared with their GP. It is protected by the principles of the Data Protection Act 1998

Consent for immunisation (please tick YES or NO)
